

## Traffic Light

Daughtry

The traffic light waits for you to tell me  
The tale of a shattered life tonight  
And I just passed by  
When you have had the chance to fight  
Or would you spend your last days alone  
Thinking nobody would have cared to know

Just look me in the eye and see that it's a lie

So you're telling me this is how you're going down  
You thought that I never really wanted you around  
Well you were way off track to think like that  
'Cause now you're taking back everything that you ever said  
About how I'd never want to see you again  
Well this is what I, what I left behind

(What I left behind, what I left behind)

We need a change and a minute of my time  
Did I get your name?  
Will you say that I haven't been asked that in years  
Now I think the traffic light that stood in the way  
So that I could hear what you had to say

I'm halfway through your story  
Can't help thinking that you're just like me

This is how I'm going down  
I thought they never really wanted me around  
Well I was way off track to think like that  
'Cause now I'm taking back everything that I ever said  
About how they never want to see me again  
Well this is what I, what I left behind

Forgetting about ourselves  
Is like history that dust is covering  
Left on the self, on the self  
The crosswalks make the way for us  
To say what we need to say

Yeah girl, this is how you're going down  
You thought that I never really wanted you around  
Well you were way off track to think like that  
'Cause now you're taking back everything that you ever said  
About how I never want to see you again  
Well this is what I, what I left behind  
This is how you're going down  
This is what I, what I left behind
