

# Endless

Dave Gahan

In the cold of the full moon  
On this night  
Time itself it slips away  
Now you are mine  
Slowly hours pass  
All through the night  
Together we can disappear  
For a while I am still  
Forever and ever and ever  
Now I am still  
Forever and ever and ever  
Endless  
Endless  
Now I am still  
Endless  
Endless  
Your body is endless

Watching the hourglass  
On that night  
We touched the stars  
And reached the moon  
For a time  
I'm lost in a moment with you  
It feels right  
We're floating above the stars  
You and I

I am still  
Forever and ever and ever  
Now I am still  
Forever and ever and ever  
Endless  
Endless  
Now I am still  
Endless  
Endless  
Your body is endless
