

# Time

David Allan Coe

We have one nanosecond  
In the spectrum of time  
Cause it's about the dead  
It's all in your mind

Reality, senility  
Human race, outer space  
My head's about to overload  
Explode, explode

Alien forces live inside my brain  
I must obey them or I'll go insane

Procreation, cocentration  
Penetration, ejaculation  
My head's about to overload  
Explode, explode  
Explode, explode

Cold shots on the rocks  
You know how it makes me feel  
You better see, set me free  
Don't give me no better deal  
Anagram, sonogram  
Looking for a thing that's real  
All for sale, new ghost town

Time is something you can't steal  
Time is something you can't steal  
Time is something you can't steal

This black painted sign says:  
"Jesus saves"  
Ride on the highways  
To an early grave

Remorse, intercourse  
Voices from my alien force  
My head's about to overload  
Explode, explode

Cowboys From Hell on the radio  
Turn it up now  
Just as loud as it will go

Guitar bastards, cymbal crashers  
Strobe light flashin', motel bashin'  
My head's about to overload  
Explode, explode  
Explode, explode

Cold shots on the rocks  
You know how it makes me feel  
You better see, set me free  
Don't give me no better deal  
Anagram, sonogram  
Looking for a thing that's real

Ultrasound, vocals down

Time is something you can't steal  
Time is something you can't steal  
Time is something you can't steal

We have one nanosecond  
In the spectrum of  
Time is something you can't steal

Time is something you can't steal  
Time is something you can't steal

Time is something you can't steal  
Time is something you can't steal

We have one nanosecond  
In the spectrum of time  
Time is something you can't steal
