

Every Word You Said

David Archuleta

Used to think that the world wasn't round
And everyone believed
Then somebody took a leap of faith
And sailed across the sea
Baby I rolled my eyes when you spoke to me on Saturday
You said I shouldn't hold back just because I'm afraid
Afraid to know how I feel

When I'm alone at night in bed
And your voice is calling out in my head
I heard every word you said
Every word you said

How do you know me like this
When did you climb over these walls
You figured out my weakness and you barely know me at all
You... diamonds on every finger of my hand
And it's beautiful
So beautiful to know how I feel

When I'm alone at night in bed
And your voice is calling out in my head
I heard every word you said
Every word you said

I was scared and you know
Fear can always bring you down
I'm ready now
To hear everything
Tell me everything
I used to think I'd never find love
But I listened and I believe
I know how it feels

When I'm alone at night in bed
And your voice is calling out in my head
I heard every word you said
I heard every word you said
Every word you said
