

# Parachutes And Airplanes

David Archuleta

There's something crazy about this day  
Like I'm walking on a trampoline  
I couldn't get much higher

So if I asked you, would you stay?  
Cause you remind me of a ballerina dancing on a wire  
And I don't ever wanna say goodbye  
I just wanna steal this moment right away from time

What do you say when you cant come down?  
When you feel like you're 10 feet off the ground  
What do you do when you're on the edge?  
Now you're here and you've got me thinking about  
Parachutes and airplanes  
Thinking about parachutes and airplanes  
Never hit the ground.. ground ground ground

The world's a thousand shades of blue  
Like we're here in our kaleidoscope  
Don't want it to be over  
Like everything that's in my mind  
It's here right in front of lights  
You're the one who got me here

Cause I don't ever wanna say goodbye  
I just wanna steal this moment right away from time

What do you say when you cant come down  
When you feel like you're 10 feet off the ground  
what do you d when you're on the edge  
Pow you're here and you've got me thinking about  
Parachutes and airplanes  
Thinking about parachutes and airplanes  
That never hit the ground

When it's shard sometimes  
I just need a place to get away  
Turn the world around  
I'll never calm me down  
Cause I don't ever wanna hit  
Don't wanna hit the ground

Ground ground ground ground  
Ground ground ground ground

What do you say when you cant come down  
When you feel like you're 10 feet off the ground  
What do you do when you're on the edge?  
Now you're here and you've got me thinking about  
Parachutes and airplanes  
Thinking about parachutes and airplanes

What do you say when you cant come down  
When you feel like you're 10 feet off the ground  
What do you do when you're on the edge?  
Now you're here, and you've got me thinking 'bout  
Parachutes and airplanes

Thinking about parachutes and airplanes  
That never hit the ground.. ground ground ground

Never hit the ground.. ground ground ground
