

# When I Live My Dream

David Bowie

When I live my dream, I'll take you with me  
Riding on a golden horse  
We'll live within my castle, with people there to serve you

Happy at the sound of your voice

Baby, I'll slay a dragon for you  
Or banish wicked giants from the land  
But you will find, that nothing in my dream can hurt you  
We will only love each other as forever

When I live my dream  
When I live my dream, I'll forgive the things you've told me

And the empty man you left behind  
It's a broken heart that dreams, it's a broken heart you left me  
Only love can live in my dream  
I'll wish, and the thunder clouds will vanish

Wish, and the storm will fade away  
Wish again, and you will stand before me while the sky will paint an overture  
And trees will play the rhythm of my dream

When I live my dream, please be there to meet me

Let me be the one to understand  
When I live my dream, I'll forget the hurt you gave  
Then we can live in our new land  
Till the day my dream cascades around me  
I'm content to let you pass me by  
Till that day, you'll run to many other men  
But let them know it's just for now  
Tell them that I've got a dream  
And tell them you're the starring role  
Tell them I'm a dreaming kind of guy  
And I'm going to make my dream  
Tell them I will live my dream  
Tell them they can laugh at me  
But don't forget your date with me  
When I live my dream
