D. Cassidy/S. Shifrin/M.D. Ehmig I've been waitin' in your dark room With the full moon in my eyes Baby you should have locked your window 'Cause I warned you I'd come back to say goodnight And I've waited all this time to let you know It's taken me this long to let you go You remember me How you stole my life I've come back to get What you took that night You can't hurt me now I'm all over you When I leave my heart goes with me When I leave my heart goes with me this time Got no switchblade in my pocket Got no razor up my sleeve Nothin' I'd do could compare to The way you cut the heart right out of me And I've got to see your face before I go There's something I've just got to let you know You remember me How you stole my life I've come back to get What you took that night You can't hurt me now I'm all over you When I leave my heart goes with me When I leave my heart goes with me this time I've fallen from the mountain Been swept up by the storm Stumbled through the desert Just to make it to you door So I think it's only fair you should know Now I'm strong enough to really let you go
