

# Heroes

David Cook

As the sun goes down in front of me  
It reminds me where I wanna be, with you and you alone  
Pull me in like you were made for me  
I'm losing faith in gravity and I just need to let you know  
And I just need to let you know

I'm not gonna come down, down off of these clouds  
All these heroes come and go, you're still standing  
You teach me to rise up, to open my eyes up  
All these heroes come and go, you're still standing  
You're still standing

When the world's confusing, I don't care  
I'll crawl into your atmosphere  
I know you'll make it right  
You're all I need to know

I'm not gonna come down, down off of these clouds  
All these heroes come and go, you're still standing  
You teach me to rise up, to open my eyes up  
All these heroes come and go, you're still standing

I believe that you can save me  
And you'll never let me fall  
I believe in what you've shown me  
Maybe there's a hero in us all

I'm not gonna come down, down off of these clouds  
All these heroes come and go  
You teach me to rise up, to open my eyes up  
All these heroes come and go, you're still standing

I'm not gonna come down  
I'm not gonna come down, you're still standing  
All these heroes come and go, you're still standing  
All these heroes come and go
