This kind of love don't need a home This kind a heart beats all alone This kind of world, gonna let it go Lay down the things that came before.

The sky is dark enough to swallow you, a storm Violence the least of all its forms.

This kind of love don't need a home This kind a heart beats all alone This kind of world, gonna let it go Lay down the things that came before.

This kind of love don't need a home This kind a heart beats all alone This kind of world, gonna let it go Lay down the things that came before.
