

# Is There A Chance

David Foster

There you are again  
Standing in my door  
Such a constant friend  
Couldn't need you more

In a different light  
I see a different sight  
How you look betrays  
What you're trying to say

I've seen you hide your face  
You felt out of place  
I was watching you  
You tried to deny  
What you felt inside

Is there a chance that you could  
Fall in love with me  
Don't be afraid of feeling  
What comes naturally

You've been by my side  
While I've laughed and cried  
I guess I always knew  
It'd be me and you

I've seen you hide your face  
You felt out of place  
I was watching you  
You tried to deny  
What you felt inside

Is there a chance that you could  
Fall in love with me  
(Forever and ever)  
Don't be afraid of feeling  
What comes naturally  
(Forever and ever)

Is there a chance that you could  
Fall in love with me  
Don't be afraid of feeling  
What comes naturally

Love is takin' chances  
How can we resist it  
God, I really want it  
Oh, we nearly missed it
