

Ain't a Party

David Guetta

Ain't a party without me, a party without me
A party without me, I make the beats and make you dance
A party without me

A party without me
A party without me
I pump the base that makes you dance
A party without me
A party without me
A party without me
I make the beats that make you dance
A party without me
A party without me
A party without me
I wanna see you raise your hands
A party without me
A party without me
A party without me
I make the beats that make you dance
A party without me
A party without me
A party without me
Let me see your fucking hands

Let me see your fucking hands
Let me see your fucking hands

A party without me
A party without me
A party without me
A party without me
A party without me
A party without me
Let me see your fucking hands
Let me see your fucking hands
Let me see your fucking hands

Ain't a party without me no?
There's crazy everywhere that I go
One day I'll put it all behind
But trouble always seems to find me

Holding now a party
Get crazy with somebody
Are you feeling naughty?
I ain't even started

A party without me
A party without me
A party without me
I make the beats that make you dance
A party without me
A party without me
A party without me
I wanna see you raise your hands
A party without me
A party without me

A party without me
I make the beats that make you dance
A party without me
A party without me
A party without me
Let me see your fucking hands

Let me see your fucking hands
Let me see your fucking hands

A party without me
A party without me
A party without me
I pump the base that makes you dance
A party without me
A party without me
A party without me
Let me see your fucking hands
Let me see your fucking hands
Let me see your fucking hands
