Live life given now, tomorrow can wait Dance all through the night, sleeping all day Stuck inside a box, you gotta get out Stand up, get up, live your life now, come on

Stand up, get up Come on, yeah, yeah, yeah Come on, come on

Live life given now, tomorrow can wait
Dance all through the night, sleeping all day
Stuck inside a box, you gotta get out
Stand up, get up, live your life now
Come on, yeah, yeah, yeah

Come on, get up Stand up, get up Let's go right now

People lining through this life we lead

Never knowing what we'll find out

So we're living, working and waiting for the day

There'll be something that's coming to take the pain away

We wait for nothing inside your ways

You gotta let that fun girl through

Live life given now, tomorrow can wait Dance all through the night, sleeping all day You're stuck inside a box, you gotta get out Stand up, get up, live your life now

Sometimes it feels
How love indeed
And we're just floating
Searching infinity, infinity, infinity

Come on and dance here tonight, tomorrow can wait Dance all through the night, sleeping through the day Stuck inside a box, you gotta get out Stand up, get up, live your life now, come on
