

Our First Night Together

David Hasselhoff

Here we are alone at last
Face to face with no distractions
Reaching out each of our separate world
Everything happened so fast
What could have been a chain reaction
Who can say where it might be tonight, oh oh, oh

This could be our first night together
Listen to my heart and you'll know it's right
Doesn't it seem there's a spell falling over us tonight
This could be our first night together
If we only follow our heart's desire
Waiting like a fire to ignite, could be our first night tonight

There's a look you've got in your eyes
All a glow and so inviting
Telling me you're watching my every move
Why should we wait for a while
When your touch is so exciting
Full of fire burning beyond control, oh, oh, oh

This could be our first night together
Listen to my heart and you'll know it's right
Doesn't it seem there's a spell falling over us tonight
This could be our first night together
If we only follow our heart's desire
Waiting like a fire to ignite, could be our first night tonight

First night together!
Listen to my heart and you'll know it's right
Doesn't it seem there's a spell falling over us tonight
This could be our first night together
If we only follow our heart's desire
Waiting like a fire to ignite, could be our first night, tonight
