

# Our First Night Together

David Hasselhoff

Here we are alone at last  
Face to face with no distractions  
Reaching out each of our separate world  
Everything happened so fast  
What could have been a chain reaction  
Who can say where it might be tonight, oh oh, oh

This could be our first night together  
Listen to my heart and you'll know it's right  
Doesn't it seem there's a spell falling over us tonight  
This could be our first night together  
If we only follow our heart's desire  
Waiting like a fire to ignite, could be our first night tonight

There's a look you've got in your eyes  
All a glow and so inviting  
Telling me you're watching my every move  
Why should we wait for a while  
When your touch is so exciting  
Full of fire burning beyond control, oh, oh, oh

This could be our first night together  
Listen to my heart and you'll know it's right  
Doesn't it seem there's a spell falling over us tonight  
This could be our first night together  
If we only follow our heart's desire  
Waiting like a fire to ignite, could be our first night tonight

First night together!  
Listen to my heart and you'll know it's right  
Doesn't it seem there's a spell falling over us tonight  
This could be our first night together  
If we only follow our heart's desire  
Waiting like a fire to ignite, could be our first night, tonight
