If You Were Never Here

David Houston

I burn the pictures I hocked the ring I got a rid of everything That had the slightest chance to make a mem'ry reappear I sold the house now that's the last of things that link me to the past

So how can you be gone if you were never here If you were never here I never loved you at all The past will be the future before a tear has time to fall The Salvation Army came and took the balance of your things So how can you be gone if you were never here

If you were never here...
