## **Move A Little Farther Along**

## **David Houston**

You've been followin' me with your painted blue eyes Since I walked in this bar and sat down Just because my sweet baby is not by my side Don't mean that I'm slipping around

So move a little farther along find somebody who is too weak to be strong

Check faces down the line stop looking at mine move a little farther along  $% \left( 1\right) =\left( 1\right) +\left( 1\right)$ 

Just because I've been by here a few times and stopped Don't mean my heart's breaking in two
Even though I played sad songs on that old jukebox
There's no reason to think I need you
So move a little farther along...
Move a little farther along
