## **Broke My Heart**

**David Nail** 

Just the way you float through a crowded room With that long, tangled blonde hanging down Just the way you move to the groove playing in my head The soft of your lips, the touch of your hand The being your man when it's time to go

Even if you'd never broke my heart Even if you'd never broke my heart I'd still be begging you to tear it apart Even if you'd never broke my heart

If you were mine again by now We'd be making out in the backseat of a city cab We'd hit the floor just past the door 'cause we can't wait Baby, we can't wait It'd be the sun coming through The window and you still being here

Even if you'd never broke my heart Even if you'd never broke my heart I'd still be begging you to tear it apart Even if you'd never broke my heart [x3]

Even if you'd never broke my heart
