Blinded

David Usher

Turn me out then turn me on Pretty flower can you tell me what's become of who we are Only asking what you'd like tonight Well take America Just shake my tits and ass yeah we'll go far

And if we wanted more Then that was only what we thought our right was Only wanted more but we were always blinded Here we want to try But I can't try to be as plain as daylight Looking to the world But we were always blinded

Sell a little bit to you A circus sideshow but the makeup's shining through it's not so bad Is there anyone to know Forget my politics just sex me 'til I'm done it's not so hard

And if we wanted more Then that was only what we thought our right was Only wanted more but we were always blinded Here we want to try But I can try to be as plain as daylight Looking to the world But we were always blinded

And all the stars are out for you And everybody's hiding here And all the stars have come unglued But everybody everybody's changing We're changing We're changing

And if we wanted more Then that was only what we thought our right was Only wanted more but we were always blinded Here we want to try But I can't try to be as plain as daylight Looking to the world But we were always blinded Always blinded

And all the stars are out for you And everybody's hiding here And all the stars have come unglued But everybody everybody's changing We're changing We're changing We're changing

Thank you
