Brilliant

David Usher

So far so good Stumble through life so complicated it's nearly Impossible And i lost my way like i knew i would and keep it Together somehow anyway And i remember you and me Climbing over backyard fences diving naked in the Swimming pool All those faces friends those memories fade so fast Like every love song on the radio Is it brilliant where you are Where the lights are low Is it brilliant where you are Where the lights are Through a million days through a million hazy nights

We sit amusing in our politics Through wine and talk through sex and art we fill our time And numb ourselves with what's to come But i'm older now got a little girl of my own Find more similar lyrics on http://mp3lyrics.com/IwIAnd her fea rs are my fears now I know that it's the end of days for moderates But thinking people are thinking still

Is it brilliant where you are Where the lights are low Is it brilliant where you are Where the lights are

So far so good Stumble through life so complicated it's nearly Impossible And we lost our way like i knew we would And keep it together somehow anyway Woke up from an impossible dream And we talked and we spoke and we drank and we sang And we danced and we live and we love and we give Without question or faith then we fight till we hate And we hope and we pray that this violence will fade It's always the same it's the same life
