

# Hallucinations

David Usher

Breathe  
Hallucinations start to fade  
All the colours are back to grey  
I never understood these things I hated,  
But now, as we all disappear  
The world becomes quiet clearly  
Something I can live in  
If I could just get through tonight

The poison's in my head  
And I can't feel my legs  
I'm not feeling anything

I'm standing at the top looking down  
Thought I'd be so free  
Float in outerspace, take a breath  
Don't you breathe too deep  
I'm standing at the top looking down,  
Thought it'd be so damn easy  
I thought it would be easier

Wait, hallucinations back in place  
I said I'd call if I can't face  
Another day of normal  
That's what they gave me  
But now the telephone's on fire  
And I can't seem to dial  
Even though I know  
You're there to save my soul tonight

The poison's in my head  
And I can't feel my legs  
I'm not feeling anything  
I can't feel anything

I'm standing at the top looking down  
Thought I'd be so free  
Float in outerspace, take a breath  
Don't you breathe too deep  
Stepping off the top, feel the wind  
Underneath my feet

Standing at the top looking down  
Float in outerspace; there's no sound

The poison's in my head  
And I can't feel my legs  
I'm not feeling anything

I'm standing at the top looking down  
Thought I'd be so free  
Float in outerspace, take a breath  
Don't you breathe too deep  
Stepping off the top, feel the wind  
Underneath my feet

Standing at the top looking down

Float in outerspace; there's no sound

I feel alive

I feel alive

I feel alive...
