Hallucinations

Breathe Hallucinations start to fade All the colours are back to grey I never understood these things I hated, But now, as we all disappear The world becomes quiet clearly Something I can live in If I could just get through tonight

The poison's in my head And I can't feel my legs I'm not feeling anything

I'm standing at the top looking down Thought I'd be so free Float in outerspace, take a breath Don't you breathe too deep I'm standing at the top looking down, Thought it'd be so damn easy I thought it would be easier

Wait, hallucinations back in place I said I'd call if I can't face Another day of normal That's what they gave me But now the telephone's on fire And I can't seem to dial Even though I know You're there to save my soul tonight

The poison's in my head And I can't feel my legs I'm not feeling anything I can't feel anything

I'm standing at the top looking down Thought I'd be so free Float in outerspace, take a breath Don't you breathe too deep Stepping off the top, feel the wind Underneath my feet

Standing at the top looking down Float in outerspace; there's no sound

The poison's in my head And I can't feel my legs I'm not feeling anything

I'm standing at the top looking down Thought I'd be so free Float in outerspace, take a breath Don't you breathe too deep Stepping off the top, feel the wind Underneath my feet

Standing at the top looking down

David Usher

Float in outerspace; there's no sound
I feel alive
I feel alive
I feel alive...
