

# Northern Lights

Dawn Richard

I am a knight of the light  
Light of my mind and of heart  
Together we hold much might  
We can never be broken apart

So what are we doing?  
What are we waiting for?  
Get into the music  
Let's get into the temple  
What you want is some no shit  
Got me stuck in the symbol  
Positions of movement  
Less as your potential

Love is on our tongues, boy can't you taste it?  
Ride among the stars, don't need a spaceship  
Empty all your love, boy I'm all wasted  
Smoke you right on up, let's take a space strip

I can take you to the northern lights  
I can take you to the northern lights  
I can take you to the northern lights  
I can take you to the northern lights

Enough with the small talk  
Just turn it all off  
Went down the spots between, we gon create our race oh oh  
Placed into the nightfall  
May come in a shadow  
Tonight all the stars in heaven are waving a finger

Love is on our tongues, boy can't you taste it?  
Tonight up on the shines, don't need to chase her  
I want all your love, swear I'm all wasted  
Smoke you right on up, let's take a space strip

I can take you to the northern lights  
I can take you to the northern lights  
I can take you to the northern lights  
I can take you to the northern lights

I can take you, I can take you  
I can take you to the northern lights  
I can take you, I can take you  
I can take you to the northern lights

I can take you to the northern lights  
I can take you to the northern lights  
I can take you to the northern lights  
I can take you to the northern lights

I can take you, I can take you  
I can take you to the northern lights  
I can take you, I can take you  
I can take you to the northern lights  
I can take you, I can take you  
I can take you to the northern lights

I can take you, I can take you  
Let me take you to the northern lights
