## **Domestic Violence**

Shaking by herself crying for the pain of her wounds Fear is all she's known for so long Always lonely Always down Stuck in that shit Blind and scared Scream out loud Pain, Misery Make it known All around And free you from this hell The beatings are not all she is ashamed and alone Dreams are all gone but lies are real Always lonely Always down Stuck in that shit Blind and scared Scream out loud Pain, Misery Make it known All around And free you from this hell Why should fuckers like you deserve to have a life You don't have a conscience or a heart You are so low Shame of men But you'll burn in hell Gather your stuff, fly away

## Dawnless

Yeah fly away
