

# I Am the Door

## Day of Fire

You said you would have but u couldn't let go  
You said you should have but you needed some more  
I know you would have, if you could have it all  
You said you would have, but you needed, needed some more

You need a way, to leave yourself behind  
To burry your name  
To fade across the line

You said you should've but you wouldn't let go  
You said you could've but you needed some more  
I know you would've if you could've at all  
You said you wouldn't but you needed, you needed some more

You need a way to leave yourself behind  
To burry your name  
To fade across the line  
To breathe again  
To fade across the line

I am the only way out  
one step into the door  
I am the only way out

You said you could have but you wouldn't let go  
you said you would have but you needed some more  
I know you should have but you wanted it all  
You said you would've but u needed, needed some more

You need a way to leave yourself behind  
To burry your name  
To fade across the line  
To breathe again  
To fade across the line

I am the only way out  
one step into the door  
I am the only way out

You need a way to leave yourself behind  
To bury your name  
To fade and cross the line  
To breathe again  
To fade and cross the line

I am the only way out  
I am the door
