

Long Highway

Day of Fire

Drive into the unknown; we don't say a word turn up the radio
Miles of silent conversations, searching through the stations,
we sink into the road
We just drive when it's not ok. We just drive accelerate...

Down this long highway we'll find a way
On this long highway to say the things that we've been so afraid to say
We'll find our way through lies and pain, it'll be ok.

Headlights shine on the street signs. Watch them passing by reflections in your eyes
Hearts broken by the distance, love turned to resistance leaves me so alone
We just drive when it's not ok. We just drive accelerate...

And we'll hold each other strong, as we weather through the storms
Even though the road is long, we'll drive all night just to make our way back home.
Down this long highway...
