## I Don't Belong

And so we broke And so you decided It was you, it's always you Even though we were friends I felt uninvited The fraternity of fools

And I'm drowning slowly (going down) And I'm fading like ink that's a hundred years old

I don't belong, say I'm wrong Told you that you should have known me better I don't belong, this is my song, this is my song

You made me a prince You made me a pauper Then you turned and closed the gate Even though I messed up There wasn't an offer, love No mercy, no grace

And I see right through you (see right through you) You wanna be just like me don't you

(Stupid things I've said and done) Oh don't you walk away (Battles that I've lost and won) Shame, shame, shame on me (What I used to think was wrong) I'm for the underdog, I like the one that don't belong
