## So Help Me God

(I got something for you, man) (Go for a ride)

Bombarded by philosophies that satisfy the surface I flee to something deeper At the risk of seeking purpose How can I hang in this environmental state of being When everything I'm striving for Is nothing that I'm seeing

Won't You take my heart, won't You take my soul Won't You come and make me whole again You, You've got what I need and You never retreat Unto You I will concede

So help me God To put my faith in You So help me God Before I come unglued Call it my addiction I can't get enough of You So help me God To put my faith in You

Infected by the skin I'm in this starving with desire And Jesus ain't the latest thing to come across the wire I throw myself at mercy for I am the chief of sinners But daily taking up my cross Has brought it's share of splinters

You're there when I call And You're there when I fall Even though I don't deserve it all You, You light my way Through the night and the day And from You I will not stray

God so help me This is my soul plea I'm desperately devoted I can't get enough of You So help me God

Cause You are the one I love Cause You are the one I need (I need you) Cause You are the one I'm seeking (Every single day) Cause You are the one for me

(I just walked into a meet in 3... And everybody's starin' at me... I gotta go)
