

## Obsolete

De/Vision

The dragon heart  
For what has once been you there's nothing left now  
Got to bow down  
You're torn apart  
Seem to be here but yet you're fading away  
Silent decay

You've got to confess  
That your life is a mess  
From what I have told you  
From what I have said  
All that you let me see  
The worst for me to believe  
You came to go down with  
Nothing but defeat  
Cause you're obsolete

Role model for  
Another generation to take things on  
Disposable ones  
Running on repeat  
An empty tape distorted background noise  
A thrown-away toy

Bent nearly broke  
That's what they did to you but not anymore  
You are long gone and leave an emptiness  
That's hard to express
