Until The End Of Time

Break with the past This time I will make it last Your love is free Waste your precious youth on me

Until the end of time Until the end of time Until the end of time Until the end of time

Until the clocks stop turning Until the stars fall into the sea Until the walls come tumbling down Until we all die in misery

Until the sky is burning Until the dawn of eternity We will be forever There is always you and me

This is how it ends Erase your whole existence Go down with me Waste your precious life on me

Until the end of time 'Til the end of time Until the end of time 'Til the end of time

Until the world is ending Until all thoughts are history Until we stop pretending Until the ignorant can finally see

Until we'll meet in the next life Until whatever will be will be We will live forever There is always you and me **De/Vision**
