

My America

Deacon Blue

Church bells go ringing for you and I
This bright sky is singing for you and I
All the land goes laughing into that glad goodbye
All the land goes laughing into that glad goodbye

Oh my America my new found land
Oh my America my new found land

Church bells go ringing and strangers cry
People keep bring their sad, sad smiles
Time wont even listen to why we had to lie
Time wont even listen to why we had to lie

Oh my America my new found land
Oh my America my new found land

Listen to the wave crash
Listen to the wave on the wide sound

She's far and she's wide and she's one small step away
She's far and she's wide and she's one small step away

Church bells keep ringing for you and I
We rush, we live, we laugh for some time night
These green fields and roads go rolling in your eye
These green fields and roads go back and back and back

Oh my America my new found land
Oh my America my new found land

Church bells go ringing for you and I
This bright sky is singing for you and I
All the land goes laughing into that glad goodbye
All the land goes laughing into that glad goodbye

Oh my America my new found land
Oh my America my new found land
