Deacon Blue

You won't believe the dirt, the rain the wind the snow  
The endless roads I seemed to travel down  
Trying to get to you

And when I'm finally there, I find you in a hole  
I realize we don't know what to do  
Nothing seems to change

This cruel world seems full of such unhappiness  
If our lives collide we may get out of this

Every day is like, the next one comes along  
It seems the same as all the other ones  
Will it ever change?

People can be easily destroyed I guess  
We're only just a word away from happiness

We can catch a rocket ship and fly away  
Through meteors and moons and galaxies  
To the avenue  
Of stars  
Stars

Surges of light  
Breaking the dark  
Street lamps in summer rain storms  
Shining across this universe  
Shining across this universe

This cruel world seems full of such unhappiness  
If our lives collide then we'll get out of this

We'll soar into the never ending universe  
Nothing else but gravity will limit us  
We will ride our rocket ship and fly away  
Through meteors and moons and galaxies  
To the avenue  
Of stars  
Stars

We'll go, we'll go, we'll go, we'll go  
We'll go, we'll go, we'll go, we'll go  
We'll go, we'll go, we'll go, we'll go  
We'll go, we'll go, we'll go, we'll go
