

I can see through the rise and fall  
The smoke and the mirror that blinds it all  
Looked up and, but just as I reach it's gone  
I know this is how it could be  
It's gone with no answers

You seem to know this  
And see through the lies  
some place I can't perceive  
And you own this  
Stand there with arms that are so wide  
I can't believe when you showed me, yeah!

Don't say another word  
I can do this on my own  
So just look the other way, and  
Don't say another word  
I can see this in my sight  
There's something I can change  
I know there's another way

It's true, you know this  
And see through the lies  
some place I can't perceive  
And you own this  
Stand there with arms that are so wide  
I can't believe  
when you showed me, yeah!

I can see through the rise and fall  
I know I could make it feel right, but I  
If I caught it, just as I reach it's gone  
I know this is how it must be, this game, with no answers  
there's no answers here  
I can hold it for you!

Don't say another word  
I can do this on my own  
So just look the other way, and  
Don't say another word  
I can see this in my sight  
I know there's another way  
I know there's another way
