

## It's O.k

## Dead Moon

(chorus)

It's okay, we've all seen better days  
It's okay, you don't have to run and hide away  
It's okay  
It's okay, yeah we love you anyway

For in those reckless moments  
When doubt is creeping in your head  
Feeling like you've lost your youth  
And the dreams you had are cold and dead  
I can't reach you anymore  
That's gonna take a different man  
I can't protect you like before  
You've slipped beyond my hands  
But it's okay.....

I wish that I could light the path  
That leads to a life of no mistakes  
Hold you from the damned be done  
That living out of safety seems to take  
I remember still the child in you  
As if only yesterday  
It was easy to break through  
I only had to kiss the pain  
But it's okay.....

This is my chance, this is my life  
And my opening hour  
This is my choice, this is my voice  
There may be no tomorrow  
This is my plea, this is my need  
This is my time for standing free  
This is my step, this is my depth  
In a world demanding of me  
But is's okay.....
