

## Don't Forget Where U Came From

dead prez

We came from the distant land  
Our lives already planned  
We came in ships from across the sea  
Never again home at sea  
And now we've become  
American fool  
With African Rules

Don't be following no bull shit  
Cause bull shit will get you killed  
Real shit will get you killed  
But bull shit will get you killed for sure
