

Dying Breed

DeadLock

No instrument of torture
No weapon
Not any fucking technical horrible machine
Can put the disaster to the next level
Evocation of armageddon

All that we can kill, has been killed before in every single possible way
Where is the extreme... that beats everything
Humanity is always innovation
Improvement of a controlled and dominated creation
Our breed has been elected

It is utterly exhausting
An awful bore
Such a miserable life
Can put the disaster to the next level
Evocation of armageddon

All that we can kill, has been killed before in every single possible way
Where is the extreme... that beats everything
Humanity is always innovation
Improvement of a controlled and dominated creation
Our breed has been elected

Pain isn't what it was anymore
Rape somebody
Kill a child
An awful bore
Pain has to be reinvented
Putting murder and violation
On a higher non human level
To become godlike

Humanity is always innovation
Improvement of a controlled and dominated creation
Our breed has been elected
To become social neglected

Humanity is always innovation
Improvement of a controlled and dominated creation
Our breed has been elected

Humanity is always innovation
Improvement of a controlled and dominated creation
Our breed has been elected

Megalomania is creation
Extremism loved to distraction
Atruism forced to rest
Such a sorrowful manifest

We are the dying breed
