

I reach between the mind and burn  
You've got a lot to learn  
You believe everything you hear  
You guys believe everything you hear

I try to tell you something new  
But you dont wanna listen to it  
Do anything I gotta do  
You're not just the way to be

Everytime I see that little face  
I know that you're going no place  
And now you want to learn why  
You hear the lies between the groove  
Now we want to show you something new  
But we don't waste our time either  
Just give it just a listen to  
Wake up your mind

You wanna be someone  
Right here in the USA  
Went out and bought a gun  
And blow the world away  
You've got the situation  
You dont know what to do  
You wanna start again  
But who do you listen to

If you want to be someone  
Right here in the USA  
Went out and bought a gun  
Blow the world away  
You want to see the things  
Believe your mind says  
It's our right to die  
With nothing in the way
