

Gravity

Dean Brody

I've heard scientists,
Get confused when you ask them to define it,
Cause its a miracle,
It keeps the universe we see from ever dying,
And the stars from falling,
Though we cant see it
It must true
And its the only thing I've found, to compare our love to

Its invisible
You cant touch it
No matter where you go on earth u cant outrun it
It only exists to pull you in
Till your where your meant to be
Girl our love is alot like gravity

Its a phenominal
How I can hunger for ur touch and need ur company
And its just beautiful,
How from across a crowded a room ur eyes will follow me till ou
r bodies meet
And when I'm not with u I feel a tug inside my heart
That's just never satisfied til I'm where you are
Its invisible you cant touch it
No matter where you go on earth u cant outrun it
It only exists to pull you in till ur where ur meant to be
Yea girl our loves a lot like gravity
Yeahhh

[guitar solo]

Its invisible
U cant touch it
No matter where u go on earth u cant outrun it
It only exist to pull u in till ur where u r meant to be
Yea girl our lvos a lot like gravity
And I'm just never satisfied till ur next to me
