

## A Place in the Shade

Dean Martin

Now some folks play the whole day long  
They think they got it made  
But they won't get a thrill the way that I live  
When I find me a place in the shade  
A poor man word is never learned still I wouldn't trade  
All the world and its gold all the treasures untold  
I want a little place in the shade  
Too late to bed and early to rise  
Makes a man weary and cuts him down the size  
They come and they go and their worlds fall apart  
But I'm gonna cling to the dreams in my heart  
Cause someday I know the years gonna come  
When all my debts are paid  
When my work is all done I'll smile at the sun  
And find me a place in the shade  
When the work is all done I'll smile at the sun  
And find me a place in the shade
