

## Which Way Did My Heart Go

Dean Martin

Which way did my heart go  
The night that we met  
I lost it so completely  
I never will forget

Which way did my heart go  
One look and I knew  
That I was yours forever  
My search for love was through

I laughed at other guys with stardust in their eyes  
I never knew the thrill of ecstasy  
But now I understand and realize how grand  
Falling in love can be

Which way did my heart go  
From me straight to you  
But darling I don't mind I know that you'll be kind  
To the heart I lost when I found you

I laughed at other guys with stardust in their eyes  
I never knew the thrill of ecstasy  
But now I understand and realize how grand  
Falling in love can be

Which way did my heart go  
From me straight to you  
But darling I don't mind I know that you'll be kind  
To the heart I lost when I found you
