Open Up

Death Angel

Best loosen up and take it in stride The world don't need egotistical pride

Open up your eyes And see the light Just do it

Ah, I just can't believe what I'm seeing It makes me sick inside Condemned by the world, the world around me I'm not gonna run and hide

I'm gonna come alive Ain't gonna take no jive Open up your sewn shut eyes Your disappearing eyes That's right

When I'm walking down the street People turn and stare at me As if I couldn't feel their eyes They're living in a world of fear and lies, yeah No thanks, yeah

Best loosen up and take it in stride The world don't need egotistical pride

Open up your eyes And see the light Just do it

Must you choose to shut your mind I look deep but nothing do I find You're so tough, hey put it on a shelf You've got to come out of yourself

Knock knock but no one's home
Excuse me please but I'm sick of society
It's not me that you have to control
You are you and I am me and if we don't agree, just let it be
Let it be, let it be

Open up your eyes And see the light Just do it

I say

Open up your eyes And see the light Just do it
