Leprosy

Death

Bodies deformed way beyond belief Cast out from their concerned society Flesh contorting day after day Freak of the dark world is what the people say

Their lives decay before their eyes
There is no hope or cure
Among their own kind they live
A life that's so obscure
First an arm then a leg
Deterioration grows
Rotting while they breathe... death comes slow

Leprosy will take control and bring you to your death No chance of a normal life to live just like the rest Leprosy will spread with time, your body soon to change Appearance becomes hideous a sight too much to take

Tuberculoid the most severe Decay of the nerves comes fast Sense of feeling soon to be gone Life will never last

No hope of recovery after the nerves are eaten away Damage is done you feel no more pain Bones decay deterioration grows Origin of this horrid disease nobody knows

Their lives decay before their eyes
There is no hope or cure
Among their own kind they live
A life that's so obscure
First an arm then a leg
Deterioration grows
Rotting while they breathe... death comes slow

Leprosy will take control and bring you to your death No chance of a normal life to live just like the rest Leprosy will spread with time, your body soon to change Appearance becomes hideous a sight too much to take
