# Chaos Wartech

**Deathchain**

Tools of mass destruction gathered for genocide
Signs of final chaos fires shall fill the sky

It's fucking war

Countdown to extinction, slaughter the lambs of war
First strike is still deadly, deadliest of them all
Massive killing machines, unleash the dogs of war
Madness of the leaders, nuclear holocaust

Rebirth of terror...through deadly religions

Chaos wartech...death falls from the sky
Deadly warheads...nuclear warfare
Molten lava burns the earth
Melting bones in fiery fallout

Immolated corpses laying in the ruins
There is no escape and nowhere you're safe
Acid rain, mushroom clouds
Countless deaths, insane bodycount

Destruction of nations...by earthly damnations

Massive killing machines, unleash the dogs of war
Madness of the leaders, nuclear holocaust
Ruins are all that remain, of the kingdom lost
Enter worlds beyond, leave this world behind

Chaos wartech...death falls from the sky
Deadly warheads...nuclear warfare
Molten lava burns the earth
Melting bones in fiery fallout

Immolated corpses laying in the ruins
There is no escape and nowhere you're safe
Acid rain, mushroom clouds
Countless deaths, insane bodycount
