

## Opium

## Deathstars

Can you see them coming  
From the valleys and hills  
They finally got you  
Can you see them staring  
As the rain hits your palms  
They are here to gut you  
Can you here them speak your name  
They shout it out  
So the storm can come through  
Can you hear them celebrate  
That they found you  
Their knives will slip through  
I know... I know... That you can...  
Zeitgeist  
Wow wow
