

The Fuel Ignites (Fuel For Cowboys Remix)

Deathstars

I let the flames lick your skin
It tastes like fever
And candy and tin
I let the fire explode and the win
So the end begins!

Child of light
Let my hand carry you along
Child of light
Your mother's milk is long gone

But will they ever come back to us
Those who were buried in the golden
Dust

They will never let you back tonight
Light!
The fuel ignites

Never let you back tonight
Fight!
The fuel for frights

I knew that you would die this way
Torn apart on a pale summerday
I knew that you would end up as prey
Innocence must pay!

Trash of night
Celebrate all that is gone
Trash of light
And the air fills broken songs

But will they ever come back to us
Those who were buried
In the golden dust

They will never
Let you back tonight
Light!
The fuel ignites

Never let you back tonight
Fight!
The fuel for frights

Feed the rage
Feed the lies
Line up the victims
Under ravishing skies
Feel the rage
Feel the lies
See through the flames...
That dance in my eyes
