

# The Fuel Ignites (Fuel For Cowboys Remix)

Deathstars

I let the flames lick your skin  
It tastes like fever  
And candy and tin  
I let the fire explode and the win  
So the end begins!

Child of light  
Let my hand carry you along  
Child of light  
Your mother's milk is long gone

But will they ever come back to us  
Those who were buried in the golden  
Dust

They will never let you back tonight  
Light!  
The fuel ignites

Never let you back tonight  
Fight!  
The fuel for frights

I knew that you would die this way  
Torn apart on a pale summerday  
I knew that you would end up as prey  
Innocence must pay!

Trash of night  
Celebrate all that is gone  
Trash of light  
And the air fills broken songs

But will they ever come back to us  
Those who were buried  
In the golden dust

They will never  
Let you back tonight  
Light!  
The fuel ignites

Never let you back tonight  
Fight!  
The fuel for frights

Feed the rage  
Feed the lies  
Line up the victims  
Under ravishing skies  
Feel the rage  
Feel the lies  
See through the flames...  
That dance in my eyes
