

## Track, Crush & Prevail

Deathstars

All bones are broken and we lie here on the floor  
The rats are coming, they smell us, they need some more  
We must pursuit this virus in the clinics of chains  
We crawl on ripped joints with fever in Mephisto's back lanes

I know you feel it - you want it  
More and more and more...

Track, crush and prevail  
Now come, let's hunt for ersatz souls  
Track, crush and prevail  
Watch the blood turn your diamonds into coal

The science of darkness and we practice all its codes  
Their values turn, they guide us on titanium roads  
We must reduce ourselves in surgeries grace  
We amputate our parts and let prosthetics replace

I know you feel it - you want it  
More and more and more...

Track, crush and prevail  
Now come, let's hunt for ersatz souls  
Track, crush and prevail  
Watch the blood turn your diamonds into coal

Grab the claws - take my hand  
Serve the cause - take command  
I will show you my plan

Cut the ropes - come as free  
Here's the gate - turn the key  
I will let you be grand

Track, crush and prevail  
Now come, let's hunt for ersatz souls  
Track, crush and prevail  
Watch the blood turn your diamonds into coal

Track, crush and prevail  
Track, crush and prevail  
This is your fall  
Track, crush and prevail  
The devil pays cash when your soul is on sale
