## Thanksgiving

I picked this yellow for my curtins It's warm and true And it looks like you

I catch sight of a Wild bird on a long post On a long fence

And I can see you everywhere In the trees outside my window On the street in the frozen air I can see you there

There was a seed gray and small In the ground of the earth Between our hearts We'll never know What mystery made it grow It will just be our history

Now I can see you everywhere In the trees outside my window On the street in the frozen air Waiting It's a promise Waiting It's like a dare But you are with me When you can not be I can feel you here

And I can see you everywhere I can see you everywhere

I twist in a world between Hovering Wanting But I don't wish this love away I wish you back to me to stay

And I can see you everywhere In the trees outside my window On the street in the frozen air Waiting It's a promise Waiting It's like a dare But you are with me When you can not be I can feel you here

And I can see you everywhere I can see you everywhere I can see you everywhere Everywhere Everywhere Tištěno z www.txp.cz **Deb Talan**
