

## Polarity

## Decrepit Birth

Parallels exist within  
Reflection of time and space  
Inside of dimension  
Dualities evolving from a  
Single-cell universe within the molecule

Within this dimension  
Of my creation  
In the blinding light of darkness  
I remain one/we become one  
Constant fluctuation  
Two suns born  
Born of the atom  
Symbiotic opposition  
Recreation of life changing

Individual... sovereignty  
Absorb the other... fusion

Conception of time's vibration collapses within  
Ancient forces of opposition  
Eternal balances of existence  
Aeons... futures... past... evolution  
Internal axis of resistance  
Pre-embryonic magnetic core

Creation of all worlds inside  
Existence of thought  
Reaches beyond... forever

Harmony achieved through unity  
Within the spectral fields of light... called time
