

# Forever With You

Decyfer Down

Like shooting stars  
How brief we are  
I wish this moment could last forever  
Here with you  
I am made new  
I want to live like every breath matters  
You're not so far away  
Just hear me when I say

I wanna love what you love  
I want to see what you see  
I want a heart that burns like a fire in me  
I want your light in my life  
I want my heart renewed  
Here I am  
Forever with you

The falling rain  
Can bring a change  
I never knew how far that I could fall  
I can hardly wait  
'Til I see you face to face  
I can't believe your love remains the same  
You're not so far away  
Just hear me when I say

I wanna love what you love  
I want to see what you see  
I want a heart that burns like a fire in me  
I want your light in my life  
I want my heart renewed  
Here I am  
Forever with you

Now that I am here with you  
After all that I've been through  
I just can't live without  
The grace you gave to me  
Now I see what you see  
Your beautiful life forever in me

I wanna love what you love  
I want to see what you see  
I want a heart that burns like a fire in me  
I want your light in my life  
I want my heart renewed  
Here I am  
Here I am  
Here I am  
Forever with you
