

## Life Again

Decyfer Down

I don't remember the last time I could say  
I was where I wanted to be  
Still you see through this mask  
Hiding all my flaws  
You see something down deep in me...

Bring me back so that I can feel you again  
Take me to that place I was before  
All I want is to hold my head up high  
So take this life and set aflame again

Still I linger around  
A life unchanged  
I just can't break the cycle now  
I feel I've lost my hope  
Trapped in my own mind  
Break these thoughts that are clouding me

Bring me back so that I can feel you again  
Take me to that place I was before  
All I want is to hold my head up high  
So take this life and set aflame again

Again, Again,  
Set my life aflame again...

Bring me back so that I can feel you again  
Take me to that place I was before  
All I want is to hold my head up high  
So take this life and set aflame again

Bring me back so that I can feel you again  
Take me to that place I was before  
All I want is to hold my head up high  
So take this life and set aflame again
